## OBJECTIVE

---

I'm a motivated and detail-oriented Computer Science graduate looking for an entry-level Web Developer position. I want to use my skills in HTML, CSS, JavaScript, and other web technologies to build user-friendly and responsive websites. I'm eager to learn more and grow as a developer while working with a supportive team.

## EDUCATION

---

**Bachelor of Computer Science**, Chandigarh University

2021 - 2025

## SKILLS

---

**Technical Skills** HTML, CSS, JavaScript, TypeScript, SQL

**Soft Skills** Problem-Solving, Communication, Creativity, Open to Feedback

**TOOLS** VS Code, Git, GitHub, Canva

## EXPERIENCE

---

**Frontend Developer**

Web Development Projects (Academic)

Jan 2024 - Present

*Chandigarh University, Mohali*

## PROJECTS

---

**1. Portfolio Website.** HTML, CSS, JavaScript, Responsive Design Created a personal portfolio website to showcase skills, projects, and contact information. Designed with mobile responsiveness and a clean, modern UI.

**Weather App.** JavaScript, Fetch API, HTML, CSS Built a weather forecast app using a public API (like OpenWeatherMap) to fetch real-time weather data based on city input. Displays temperature, humidity, and weather conditions dynamically.

**Responsive Landing Page for a Startup.** HTML, CSS, Tailwind CSS Designed and built a mock landing page for a fictional business. Focused on layout, call-to-action buttons, responsive design, and clean UX.

## EXTRA-CURRICULAR ACTIVITIES

---

- Engaged in UI/UX design contests to enhance front-end development skills

## LEADERSHIP

---

- Served as a class representative, facilitating communication between students and faculty and organizing events, and volunteer in Lik Sabha election 2019. Supported election officials in organizing polling stations, ensuring smooth and fair voting processes
